### **Supporting Letter for BWT&UWT2014,**

On behalf of the Rainwater Harvesting Association of Australia, I would like to express our support for BWT&UWT 2014.

Australia has a significant rainwater harvesting industry both in urban and metropolitan markets. Due to the historical dryness of our country we have learnt many techniques in rainwater harvesting over a long period of time. In fact, most rural Australian households depend on rainwater for their drinking and domestic water needs.

We look forward to this global water industry event. It will provide an exciting platform for representatives to learn the best practices and technology applications and share our experiences in the water industry.

We anticipate a good business networking opportunity in China where the market of Rainwater collection and utilization is in rapid development.

We offer our best wishes and success for this event.
